

**Remedial Classes:** At the end of each semester, the institute conducts remedial classes, which is kept open for all students and focuses primarily on those who abstain from classes or those students identified as slow learners.

**Bridge Course:**

Students from different streams of study who require support are given extra attention through Bridge courses conducted by the College. Bridge Courses are offered to students who enter the course from a different stream of study. For example students from science and arts background taking up admission in BBA/BCom courses, Commerce background students taking up admission in BCA are provided with these courses to be on par with students from the same stream. Apart from this the class mentors and subject teachers identify the slow learners and give them individual attention through extra coaching.
